

What is Your Resident Profile?

Your Resident Profile provides the information you need to begin the resident profile portions of Components 1 and 2 of the annual Facility Assessment required under the Centers for Medicare and Medicaid Services (CMS) Requirements of Participation ([F838- Facility Assessment](#)). The purpose of the Facility Assessment is to help a facility determine the resources required to provide person-centered care and the services its residents need in both day-to-day operations and emergencies. Furthermore, the facility assessment allows facilities to understand the competencies they need to focus on to ensure their residents are provided care that allows the resident to maintain or attain their highest practicable physical, mental, and psychosocial well-being.

CMS’s Quality Improvement Organizations (QIO) have provided a [Facility Assessment](#) for facilities to utilize as a starting point for building their individualized Facility Assessment. *Your Resident Profile* was developed from the Resident Profile section of the QIO template.

AHCA used the MDS, CASPER, and PBJ data submitted by your facility to CMS to summarize the types of residents and services provided in your facility over 24 months, broken into two 12-month time periods. Details of how we calculated elements of the tables in *Your Resident Profile* can be found in the table beginning on page 3.

What do the numbers in my report mean?

Your Resident Profile offers two ways to look at your resident population:

1. **Episode:** the period of time a person is in your facility from admission to discharge or death
 - episodes are counted if any part of the episode time-period fell in the measurement year
 - episode counts in *Your Resident Profile* are the number of episodes in the measurement year where at least one MDS assessment from the episode met the criteria for the listed category
 - Note: an individual person may contribute more than one episode to your total count if they have repeat admissions during the measurement year
 - % of episodes in *Your Resident Profile* are the episode counts for a category, described above, divided by the sum-total of all episodes of any kind in your facility over the measurement year
2. **Resident Day:** any day that a resident was physically in your facility.
 - resident day counts in *Your Resident Profile* categories are the number of days any residents were in your facility during a measurement year with a particular diagnosis or care need, as indicated on their MDS assessments
 - % resident days in *Your Resident Profile* are the resident day counts, described above, divided by the sum-total of all your facility’s resident days, for all residents, during the measurement year

How do I use this information?

Your Resident Profile is offered as a starting place for facilities to begin the process of creating an individualized and comprehensive facility assessment. Facilities can use some or all this information

in their Facility Assessment, as well as adding information from in-house data sources as appropriate. Each facility is different. CMS understands this and expects each facility’s assessment will be unique.

Detail of Categories Included in Your Resident Profile

The categories below represent the information you will find in *Your Resident Profile*. The categories were developed from the QIO Facility Assessment template (<http://qioprogram.org/facility-assessment-tool>) with input from AHCA staff and members with clinical and operations research.
