

Program Description:

The Nursing Home Administration webinar series delivers a comprehensive review of key topics that affect how successfully administrators operate skilled nursing facilities. The modules relate to all aspects of facility management including financial, clinical, regulatory, and leadership. Under each of these overarching topics, are detailed webinars that review important topics including:

- Payers;
- Revenue cycle management;
- PDPM;
- CMS 5-star quality measures;
- The history of long-term care regulations;
- How statutes, regulations, and guidance differ;
- Leadership and team building;
- Survey preparation; and,
- Post-survey actions, including writing plans of correction and QAPI.

This series builds upon training and education administrators received in their Administrator in Training programs and clarifies the rationale behind the actions nursing facility administrators should take each day to effectively manage their facilities. DONs will also gain valuable knowledge from this webinar series to help them successfully manage clinical operations.

Course Objectives:

Upon Successful completion of this program, the participants will:

- Understand various topics that are key in the management of skilled nursing facilities
- Explain the why behind regulations, and how to review them
- Feel empowered to successfully run their facility and advocate for their facility, if necessary, throughout the survey process
